

Areta suite cabinet

Areta is not just a Modular cabinet but a complete system, which allows several solutions for the distribution and automation business.

Thanks to the well-designed orthogonal joint, the cabinet can be mounted in only a few minutes.

The mounting operation is restricted only to 8 screws and all the other accessories (hinges, fixing elements, etc.) all manufactured in alloy are already mounted, ready to be used.

The cabinet profile has been well engineered and the result provides all the safety, strength and modularity standards. Profile and orthogonal joint are welded together using the very latest in laser welding technology.

The vast range of dimensions (over 90 frame sizes) satisfies any demand.

The mounting plates, available in two versions: frontal or side entry, are adjustable in depth and easy mounted thanks to two sliding guides mounted on the bottom.

The Areta Cabinet offers the very best in style and protection with stylised handles and two colour finishing to enhance your standard product.

The Areta range has been tested according to the EN50298 standard.

Protection degree: IP 55 (NEMA 12) according to EN60529; IK 10 according to EN50102.

Paint finish: ETA standard epoxy-polyester powder coating, RAL 7032 textured finish.

features at a glance

- 90 frame sizes available
- IP 55 (NEMA 12) protection
- available fully assembled or in flat-pack
- robust frame profile
- special colours available on short lead times.

(6) supply includes 2 pieces

(7) supply includes 4 pieces

(8) supply includes 4 pieces. To be ordered separately fixing brackets WTSF-001 (page 111)

Areta 400

characteristics

• STRUCTURE

Profile and rails are made up of a unique closed profile manufactured from 1.5mm sheet steel, fully welded and with rounded edges. The frame corners are manufactured with orthogonal joints laser welded to vertical upright rails and horizontal rails for the roof and bottom. Only 8 high resistance screws are necessary to mount the structure, while two position pins allow the easy mounting of the two parts of the joint.

paint finish

ETA standard epoxy polyester powder coating.

Structure, door and rear panel RAL 7032 textured finish.

Roof and bottom RAL 7025 textured finish.

assembled cabinet (PR)

Supply includes:

- structure
- door manufactured from 2mm sheet steel with stiffening frame, complete with Ø 3mm double bar locking system
- rear panel manufactured from 1.5mm sheet steel
- removable roof manufactured from 1.5mm sheet steel
- bottom with adjustable cable entry manufactured from 1.5mm sheet steel.

flat-pack cabinet

Supply includes:

- composition to be assembled complying with customers requests
- panels and doors are supplied together with two vertical uprights complete with accessories.

conformity and approval

conformity and approval assembled cabinet

conformity and approval flat-pack cabinet

protection degree

- IP 55 complying with EN50298; EN60529
- type 12 complying with UL508A; UL50
- impact resistance IK10 complying with EN500298; EN50102.

To be ordered separately eyebolts and/or lifting brackets: see page 76.

* With side panels mounted L = 416mm

How to make an order composition: for side panels see page 71, for m. plates see page 66 or 68, for plinths H=100 - 200 see page 72.

Areta 600

characteristics

• STRUCTURE

Profile and rails are made up of a unique closed profile manufactured from 1.5mm sheet steel, fully welded and with rounded edges. The frame corners are manufactured with orthogonal joints laser welded to vertical upright rails and horizontal rails for the roof and bottom. Only 8 high resistance screws are necessary to mount the structure, while two position pins allow the easy mounting of the two parts of the joint.

paint finish

ETA standard epoxy polyester powder coating.

Structure, door and rear panel RAL 7032 textured finish.

Roof and bottom RAL 7025 textured finish.

assembled cabinet (PR)

Supply includes:

- structure
- door manufactured from 2mm sheet steel with stiffening frame, complete with Ø 3mm double bar locking system
- rear panel manufactured from 1.5mm sheet steel
- removable roof manufactured from 1.5mm sheet steel
- bottom with adjustable cable entry manufactured from 1.5mm sheet steel.

flat-pack cabinet

Supply includes:

- composition to be assembled complying with customers requests
- panels and doors are supplied together with two vertical uprights complete with accessories.

conformity and approval

conformity and approval assembled cabinet

conformity and approval flat-pack cabinet

protection degree

- IP 55 complying with EN50298; EN60529
- type 12 complying with UL508A; UL50
- impact resistance IK10 complying with EN500298; EN50102.

To be ordered separately eyebolts and/or lifting brackets: see page 76.

* With side panels mounted L = 616 mm

How to make an order composition: for side panels see page 71, for m. plates see page 66 or 68, for plinths H=100 - 200 see page 72.

Remark: for cabinets supplied flat-pack with doors 500+500, WTAP-001 mechanical latches have to be ordered separately.

Areta 1200

characteristics

• STRUCTURE

Profile and rails are made up of a unique closed profile manufactured from 1.5mm sheet steel, fully welded and with rounded edges. The frame corners are manufactured with orthogonal joints laser welded to vertical upright rails and horizontal rails for the roof and bottom. Only 8 high resistance screws are necessary to mount the structure, while two position pins allow the easy mounting of the two parts of the joint.

paint finish

ETA standard epoxy polyester powder coating.

Structure, door and rear panel RAL 7032 textured finish.

Roof and bottom RAL 7025 textured finish.

assembled cabinet (PR)

Supply includes:

- structure
- door manufactured from 2mm sheet steel with stiffening frame, complete with Ø 3mm double bar locking system
- rear panel manufactured from 1.5mm sheet steel
- removable roof manufactured from 1.5mm sheet steel
- bottom with adjustable cable entry manufactured from 1.5mm sheet steel.

flat-pack cabinet

Supply includes:

- composition to be assembled complying with customers requests
- panels and doors are supplied together with two vertical uprights complete with accessories.

conformity and approval

conformity and approval assembled cabinet

conformity and approval flat-pack cabinet

protection degree

- IP 55 complying with EN50298; EN60529
- type 12 complying with UL508A; UL50
- impact resistance IK10 complying with EN500298; EN50102.

To be ordered separately eyebolts and/or lifting brackets: see page 76.

* With side panels mounted L = 1216 mm

Mounting plate manufactured with two parts
with vertical union and stiffening omega.

Stiffening omega:
sold separately with max length 3m.

● Calculated without stiffening omega.

complementary accessories

BLANK DOOR ATPO

Door manufactured from 2mm pressbent sheet steel.

paint finish

ETA standard epoxy polyester powder coating.

Colour RAL 7032 textured finish.

supply includes

- two upright rails complete with accessories
 - door complete with sealing gasket
 - Ø 3mm double bar locking system
 - tubular stiffening frame.

For codes see tables "FLAT-PACK ARETA".

ARETA WITH SPLIT VERTICAL DOORS ATPO

Door manufactured from 2mm sheet steel material.

paint finish

ETA standard epoxy-polyester powder coating.

Standard colour: RAL 7032 textured finish.

supply includes

- doors 400+400mm wide for a single cabinet 800mm wide
- doors 800+200mm wide for a single cabinet 1000mm wide
- doors 800+400mm wide for a single cabinet 1200mm wide.

protection degree

- IP 55 complying with EN50298; EN60529
 - type 12 complying with UL508A; UL50
- impact resistance IK10 complying with EN500298; EN50102.

WTAP 001 mechanical latches to be ordered separately.

Available on request.

DOOR STOP WTFP-001

Holds the door open at 90° to avoid accidental closing.

Manufactured from 2.5mm zincpassivated sheet steel.

Supply includes 1 piece complete with mounting accessories.

complementary accessories

GLAZED DOOR ATPX

Manufactured from 2mm sheet steel with tubular stiffening frame

- 4mm transparent plexiglas sheet.

paint finish
