

boxes

ST range of wall mounting enclosures is one of the highest quality of metallic enclosures available on the market. A well engineered project, which has been continuously updated and improved, has allowed the creation of a wide range of possible variations.

The actual ST range includes the following versions:

- 32 sizes manufactured from Fe40 sheet steel with blank door
- 19 sizes with glazed doors

in both single and double door versions.

ST range main characteristic is solidity obtained thanks to the considerable thickness of the sheet steel to the high technology and automation used for products and to the proper mix of the components.

Top quality materials are used:

- high performance technopolymers are used for locking systems and hinge pins (UL94VO selfextinguishing material)
- zinc alloy hinges
- thermosetting epoxy polyester powder coating for painting
- two components polyurethane sealing gasket applied by a robot
- sheet steel.

Further features of the ST range are the 4 large size gland plates:

- a plate with removable flush plate
- removable twinting support rails to be mounted in the inner part of the door
- door reversibility obtained thanks to the screwed hinges
- gasket protection clip for transport and storage.

Four or six studs are welded inside the boxes (with the exception of 150mm depth enclosure), allowing the mounting of both an inner door, a modular chassis, a rack frame or the mounting plate adjustment system.

All the accessories are supplied separately so that to increase flexibility thus optimizing finish products inventory. STP boxes have the same characteristics.

They have a 3mm thick glazed door fitted with the care that ETA puts into all its products.

terminal boxes

Produced from a single sheet of material, these boxes have an external edge with gutter profile preventing entry of dust.

To meet different customers requirements, the boxes are offered with mounting plates or DIN profiles.

The lid is fixed with captive screws. Hinges can also be fitted. No drilling is necessary.

features at a glance

- IP 65 single door, IP 55 double door
- over 41 sizes plain door/window door
- mounting plates, gland plate/s supplied as standard
- large range of standard accessories
- modifications available on short lead times.

ST 150mm depth boxes

characteristics

Enclosure and door manufactured from 1.5mm sheet steel.
Flat mounting plate manufactured from 2.5mm.

paint finish

ETA standard epoxy polyester powder coating.
Enclosure and door RAL 7032 textured finish.

supply includes

- box
- 2 zincpassivated rails to be fixed on the door
- mounting plate
- gland plate with sealing gasket
- locking system with Ø 3mm double bar key
- screws for earthing
- mounting accessories.

conformity and approval

protection degree

- IP 65 complying with EN50298; EN60529
- type 12, 4, 4X complying with UL508A; UL50
- impact resistance IK10 complying with EN500298; EN50102.

SDV8	412		400		9.7

To be ordered separately:

- mounting plate and/or DIN rails.

SDF terminal boxes with gland plates

characteristics

Box manufactured from 1.2mm sheet steel.

- lid fixed with captive screws
- holes for fixing hinges.

paint finish

ETA standard epoxy polyester powder coating.

Colour: RAL 7032 textured finish.

conformity and approval

protection degree

- IP 55 complying with EN50298; EN60529
- type 12, 4, 4X complying with UL508A; UL50
- impact resistance IK10 complying with EN500298; EN50102.

box drilling details

section X - X

section Y - Y

only for
width=600
