Product Description

Safety category 4 light curtains, according to EN 61496-1 /-2.

The SB4-T/L/S series, are optoelectronic multibeam devices that can be used to protect working area around machines, robots, and automatic systems which can become dangerous for operators that get in touch, even accidentally, with moving parts.

The SB4-T/L/S series satisfy all applications that require the Muting function thanks to pre-assembled, pre-cabled and pre-aligned Muting sensors.

T-shaped models are available with integrated sensors for bidirectional Muting, L-shaped models for unidirectional Muting and linear models without integrated Muting sensors.
